What makes CommSPEED so great?

CommSPEED WIRELESS BROADBAND is fast, reliable broadband internet service for your home or office. Easy to use and easy to install, you just have to try it to believe it! Read a quick feature overview below, and then view [service plans and pricing](#) to order.

High-velocity broadband

Your WIRELESS BROADBAND connection is fast. Up to 1.5Mbps make it one of the fastest mobile broadband technologies available. Think smooth video and audio!

Just plug in the little modem (it's about the size of a small book) next to your PC or laptop. The signal comes from the sky, so no need to worry about cable or phone lines not reaching your home or office!

Less than five minutes to install

First, plug the wireless broadband modem into a power outlet. Next, plug the provided cable from the modem to your PC or laptop's Ethernet port. Finally, open your web browser and surf! No drivers or software to install. The five lights on the top of the modem indicate signal strength.

Pleasantly affordable

With plans starting at only \$29.99 per month, CommSPEED WIRELESS BROADBAND is great value.

WiMax Ready

We use the industry standard WiMAX standard. We call ourselves "WiMAX" ready because the standard is still in the draft stage. Once it's approved, a quick firmware upgrade and you'll be WiMAX surfing!

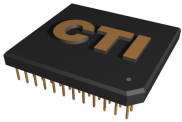

Secure and Licensed

Unlike low-cost, fly-by-night competitors, our broadband signal is FCC-certified; meaning your over-the-air data to and from CommSPEED is encrypted for fast, reliable, and secure broadband.

No contract required

You're never locked into service with CommSPEED, unlike many DSL and wireless operators. No contracts to sign!
